SUMMARY

Results-driven AI & Data Science undergraduate with hands-on experience in building machine learning models, LLM-powered applications, and AI-driven platforms. Proven ability to translate complex business problems into scalable, data-driven solutions across the full development lifecycle. Achieved Top 21 rank among 19,000+ teams at Odoo Hackathon 2025 and secured 1st Prize at ICRTAIDS 2025. Focused on developing scalable AI and Generative AI solutions to solve complex real-world problems.

KEY DIFFERENTIATORS

AIR 21 / 19,000+ Teams — Odoo Hackathon 2025

Beat 99.9% of national competitors building an Agentic AI platform (Rentiverse) under time pressure. Not just a participant — a top finisher at scale.

1st Prize — ICRTAIDS 2025 (International Conference on AI & Data Science)

Published and presented peer-reviewed research at an international AI conference as an undergrad. Most candidates at this level only have coursework.

IIT Bombay — Eureka! National Stage

Pitched 'Digital Labour Chowk' on India's most prestigious student entrepreneurship platform. Demonstrated the ability to think beyond code — into real-world impact.

8 End-to-End ML Projects — Fraud Detection, LLM Chatbots, Recommendation Systems

Not tutorials. Not Kaggle copies. Built, deployed, and iterated — including agentic AI systems with LangChain, real-time API pipelines, and computer vision proctoring.

Vice President, AISA — Led 100+ member AI/DS community

Organized technical events, led cross-functional teams, and represented the department, demonstrating strong leadership and communication skills at an early stage.

PROFESSIONAL EXPERIENCE

Data Analyst - Linkcode Technologies

Pune, India

- Designed and maintained real-time data pipelines via REST APIs, reducing manual data processing time significantly.
- Performed EDA and KPI reporting using Python and Power BI — translating raw data into actionable business insight.
- Cleaned and validated large multi-source datasets; flagged anomalies that improved downstream model accuracy.

PROJECTS

Rentiverse — Agentic AI Rental Platform

Odoo Hackathon 2025 | AIR 21 / 19,000+ Teams

- Built from scratch in <48 hours — agentic AI chatbot with autonomous decision-making for property rentals.
- Integrated LLM-based conversational interface with backend logic; demonstrated full agentic system architecture.

Credit Card Fraud Detection

- End-to-end ML pipeline: feature engineering, Random Forest / SVM / Logistic Regression, AUC-ROC evaluation.
- Model accuracy optimised on highly skewed class distribution — production-realistic problem setup.

Text Classification | PCA | Box Office Revenue Prediction

ML Portfolio — Classification, Dimensionality Reduction, Regression

- Naive Bayes NLP classifier + PCA for high-dimensional data; separate regression model for box-office revenue forecasting.
- Demonstrates breadth across classification, unsupervised learning, and regression paradigms.

E-commerce Recommendation System

NLP + Collaborative Filtering

- Built personalised recommendation engine combining collaborative filtering with NLP-based content signals.

SKILLS

Core Languages: C, Python, SQL

ML / AI: Scikit-learn, Pandas, NumPy Matplotlib, Feature Engineering

Agentic & Gen AI: LangChain, LLM Integration Prompt Engineering, AI Chatbots

Cloud & Data: AWS Cloud, GCP, BigQuery, REST API

Databases: MySQL, MongoDB

Tools: Power BI, Git, Excel

EDUCATION

B.E. — Artificial Intelligence & Data Science, Ajeenkya D.Y Patil School of Engineering

2023 – 2027 | Lohegaon, Pune

CGPA: 8.52 — consistently strong academic performance alongside heavy extracurricular output.

CERTIFICATES

Machine Learning & Data Science: — GeeksForGeeks (2025) | **Data Science with Python:** — Let's Upgrade | **Data Analysis with Python:** — freeCodeCamp | **Streaming Analytics into BigQuery:** — Google Cloud Skill Badge
